PROFESSIONAL SUMMARY

Web Design and Development, Programming - Freelance Consultant April 2016 - Current

- My recent projects include landing pages, custom WordPress sites (including WooCommerce), javascript plugins and building extensions for a cross-platform advertising solution.

Substitute and Volunteer Teaching - Galvanize, Inc. November 2015 - July of 2016

- Assisted with teaching free classes. Also, a substitute teacher for Galvanize's night classes after graduating. Our subjects were HTML5, CSS3, JavaScript and jQuery with AJAX and JSON.

Production Foreman and Field Manager - Rosewood Resources, Inc. October 2005 - October 2015

- Lead role in developing a company wide gathering and reporting system. Made a employee tracking app for HSE. Provided computer troubleshooting and basic IT services. Built many Excel VBA macros for a variety of needs. Maintain and install telemetry and metering technologies. Managed and trained employees. Overseen five fields: operations, 3rd party and employees. Developed and implemented programs, and trained employees for federal/state safety regulations. Led a GIS surveying team for environment inspections and pipeline mapping.
